High-transparency splicing tape

Reducing maculation and open rolls

SPECIAL TAPE FOR THE SPLICING OF SILICONIZED PAPERS AND FOILS

The splicing tape is tear-resistant both vertically and horizontally. It is equipped with a very shear-resistant silicone rubber adhesive of a high aging resistance.

The back side of the adhesive tape is siliconized in an easy-to-remove way to ensure the continuous siliconization of the splicing place.

It is perfect for splicing of labels which will not be registered by photo cell like for example in thermal transfer printers.

PRICES:

50 mm x 66 running meters	36.40 € / roll plus VAT
25 mm x 66 running meters	18.20 € / roll plus VAT

Minimum order 10 rolls of a type.

AVAILABLE FORMATS:

- **Roll width:** 25mm and 50 mm
- **Roll length:** 66 running meters

PROPERTIES:

- **Adhesive:** silicone
- **Color:** high-transparent
- **Roll core:** 76 mm inner diameter
- **Thickness:** 80 µ
- **Ultimate elongation:** 40%
- **Tear resistance:** > 30 N/cm
- **Adherence on silicone:** 3,5 N/cm
- **Winding:** the material is winded onto itself.
